

Proven throughout the world the KwikDRY range of refrigerant dehumidifiers will suit almost any application. From storage of rare vehicles to disaster recovery for flooded buildings. Along with the construction industry use for almost all building sites across Europe the de-humidifiers will be seen in every application where moisture control is required.

Built to out perform and out last other dehumidifiers on the market this incredibly popular unit, with its rugged design and tough, in built durability is ideally suited for the hire market.

This dehumidifier can also be supplied to various different specifications, including automatic switch over dual voltage and low temperature operation. The KwikDRY170, with its massive 170L extraction\* ensures we can offer the most versatile range currently available to hire.

\*Based on 100% r/h and 35°C

## Typical Applications – De-Humidification

Factories  
Sports halls  
Industrial buildings  
Restoration  
Water Leakage

Storage facilities  
Food processing  
Construction  
Floor Laying  
Flood Damage

### Unit specification

Unit Capacity	42 Litres / 24 Hr <small>Based on 60 %r/h @ 20 °C</small>
Airflow	11000 M <sup>3</sup> / Hr
Noise Level	60 DbA @ 3M
Condensate	Gravity Fed (External Drain or Container)
Electrics	230V 13A
Plug	Standard 3 Pin Plug – 110V Site Electric (Yellow)
Length / Width / Height / Weight	665 / 680 /1180 / 63Kg
